1. LMM Orientation

Welcome to Lemonica

Welcome to Lemonica.

We are happy to have you join the Lemonica team.

Lemonica is not only about serving drinks. It is about creating a welcoming experience through quality, cleanliness, teamwork, and hospitality.

Through the Lemonica Managing Method (LMM), you will learn the operational standards, management skills, and customer service mindset needed to run a successful Lemonica store.

This program is designed for future store leaders and managers who will play an important role in expanding the Lemonica brand internationally. As a manager, your leadership, standards, and daily actions will directly influence the success of your store, your team, and the customer experience.

Running a Lemonica store requires responsibility, consistency, communication, and attention to detail. The people around you will look to you as a leader, and the atmosphere of the store will be shaped by the standards you create.

The purpose of this program is to help you and your team understand how to operate the store consistently while delivering the Lemonica experience to every customer.

We hope this training helps you build confidence, strengthen your operational skills, and deepen your understanding of the Lemonica brand.

Thank you for being part of Lemonica.

We look forward to seeing your success as a Lemonica manager.

Purpose of the LMM Program & Responsibilities of a Store Manager

Purpose of the LMM Program

The Lemonica Managing Method (LMM) is designed to provide the operational knowledge, management skills, and leadership standards required to operate a successful Lemonica store.

The purpose of this training is not only to teach drink preparation and daily operations, but also to develop managers who can consistently maintain the Lemonica brand standard through leadership, communication, cleanliness, hospitality, and teamwork.

Every Lemonica store represents the brand itself. For this reason, maintaining consistent quality, customer experience, and operational standards is one of the most important responsibilities of every manager.

Through this program, trainees are expected to understand not only “how” to operate the store, but also “why” these standards are important for the growth and long-term success of the Lemonica brand.

By completing the LMM program, managers should be able to confidently lead store operations, train team members, solve operational issues, and create a positive environment for both customers and staff.

Responsibilities of a Lemonica Store Manager

1. Be responsible for maintaining the safe, stable, and smooth operation of the store.
2. Develop and educate future leaders and store managers within the team.
3. Represent the Lemonica brand through professionalism, hospitality, and personal standards that customers can trust and respect.
4. Become a reliable point of knowledge for the Lemonica brand, operations, and standards within your organisation.
5. Lead the preparation and operational setup required for successful new store openings.

Store Manager Qualification Criteria

The LMM certification evaluates the operational, management, leadership, and educational abilities required to successfully operate and expand the Lemonica brand.

Managers are evaluated not only on drink-making skills and operational knowledge, but also on their ability to lead teams, maintain standards, support store openings, and educate future managers.

In some cases, candidates who already have sufficient practical experience operating a Lemonica store may be eligible to take the LMM examination without attending the full training programme. This pathway requires a recommendation from an existing certified manager or responsible supervisor. However, practical experience and recommendation do not guarantee certification. All candidates must pass the required practical and written assessments.

Certification levels are divided into the following categories:

Certified LMM Trainer

Able to educate and develop future Lemonica managers.

Capable of leading store openings, managing store operations, and training future manager candidates to pass the three-day manager examination while maintaining Lemonica operational, hospitality, and brand standards.

Certified Store Manager

Able to understand, manage, and execute overall store operations independently.

Capable of leading store operations from opening preparation to daily management, maintaining operational quality, managing staff, solving store issues, and ensuring stable store performance.

Certified Store Operator

Able to independently operate daily store operations while maintaining Lemonica standards.

Capable of handling daily service, preparation, hygiene management, drink quality, and basic operational responsibilities.

Not Certified

Has not yet reached the required operational, management, practical, or written examination standards necessary for certification.

Additional training and evaluation may be required.

Important Notes

A candidate may be disqualified if their practical skill evaluation is low or if they fail the written examination, even if other evaluation criteria are met.

The examination is conducted in person and includes direct observation of practical performance and written assessment.

The purpose of the certification system is not only to evaluate operational skills, but also to develop future leaders who can successfully represent, protect, and grow the Lemonica brand.

The Goal for Your Store

What specific goals do you have for your store?

What kind of store do you want to run?

A large, empty light blue rectangular box with a thin black border, intended for the user to write their answers to the questions above.

2. Hospitality at Lemonica

At Lemonica, hospitality is one of the most important parts of the customer experience.

Customers do not only visit Lemonica for drinks. They also visit for the atmosphere, energy, cleanliness, communication, and experience created by the team.

Every action inside the store influences how customers feel about the brand. Eye contact, greetings, posture, cleanliness, speed, and teamwork all contribute to creating the Lemonica experience.

Hospitality at Lemonica is not about formal service. It is about creating a positive, welcoming, and energetic environment where customers feel comfortable and excited to visit again.

As a Lemonica manager, it is important to lead the atmosphere of the store through your behaviour, communication, and standards.

1. Customer First

Always prioritise the customer experience.

2. Hospitality

Create a welcoming, positive, and memorable experience through communication, attitude, and genuine care.

3. Quality

Maintain high standards in product preparation, service, cleanliness, and operational execution.

4. Personalisation

Understand each customer's preferences and recommend products that suit their individual tastes and expectations.

5. Appearance

Maintain a professional appearance, positive posture, organised workspace, and energetic store atmosphere at all times.

The following sections explain each principle in greater detail and how they should be applied in daily store operations.

1. Customer First

Customers should always be the highest priority.

Customers should feel welcomed and noticed as soon as they approach the store. Maintain good eye contact, keep your head up, and stay aware of customer movement both inside and outside the counter area.

As a guideline, staff should raise their head and check the customer area at least every five seconds. Keep your eyes slightly above counter level and avoid becoming too focused on preparation work.

Staff should also support each other by reminding teammates when their attention becomes too focused on tasks and customer awareness begins to decrease.

Acknowledge customers as soon as they approach the store, even if you are busy with another task.

When serving products, make eye contact, clearly announce the drink name, and whenever possible present the product with both hands.

Small actions such as eye contact, a smile, and a sincere thank you create a strong first impression and help build customer trust.

2. Hospitality

Hospitality at Lemonica is about creating a welcoming, energetic, and enjoyable atmosphere.

Always maintain an active and positive presence in the store. Even during quieter periods, staff should remain productive and engaged by completing preparation, cleaning, restocking, and other operational tasks.

Avoid standing still, gathering in groups, or creating an atmosphere that feels low-energy or unmotivated.

Active standby means always being ready to welcome customers while continuously improving the store environment and supporting smooth operations.

Customers should feel that the store is clean, organised, energetic, and ready to serve at all times.

It is also important to manage staffing efficiently according to sales and business levels. Having too many staff on shift can reduce productivity and weaken the atmosphere of the store.

During quieter periods or when additional staff are scheduled, managers should assign meaningful responsibilities such as maintenance cleaning, stock organisation, preparation support, or other improvement tasks to maintain operational quality and team productivity.

Hospitality is not only shown through words. It is reflected in the energy, attitude, teamwork, and atmosphere created by the entire team.

3. Quality

Quality is one of the foundations of the Lemonica brand.

Customers should receive the same high standard of product and service regardless of the store, time of day, or staff member preparing the drink.

Managers and staff are responsible for maintaining recipe accuracy, product consistency, cleanliness, and operational standards at all times.

Whenever possible, ingredients should be measured and added in front of the customer. This allows customers to see the preparation process and reinforces the feeling that their drink is being freshly made just for them.

When pouring lemonade syrup into the cup, staff should pour from approximately 15 cm above the cup whenever practical. This creates a more attractive presentation, and adds to the visual experience that makes Lemonica unique.

Customers should feel that their order is prepared efficiently and professionally. As a general guideline, standard lemonade products such as Classic Lemonade should be prepared and served within 30 seconds whenever possible.

Speed should never compromise quality. The goal is to deliver both excellent quality and efficient service.

Every member of the team should understand that consistency builds customer trust. One excellent experience may encourage a customer to return, but consistent experiences are what create regular and loyal customers.

Every lemonade should feel like it was made especially for the person receiving it.

Always follow approved recipes and operational standards while continuously looking for opportunities to improve the customer experience.

4. Personalisation

Recommendations are an important part of the Lemonica customer experience.

Unlike many restaurants or cafés that only offer one fixed style of lemonade, Lemonica specialises in lemonade and offers customers the ability to customise drinks based on their personal preferences.

Just like customers customise drinks at coffee shops, Lemonica allows customers to create their own favourite lemonade through different combinations of sweetness, carbonation, toppings, flavours, fruits, and tea options.

Because Lemonica focuses specifically on lemonade, it is important for staff to understand that every customer may have a different image or expectation of what “lemonade” means.

For example, in Japan, lemonade often refers to sparkling lemonade. In some Middle Eastern countries, lemonade is more commonly non-carbonated. In other countries, customers may expect lemonade to be sweeter, more sour, or more refreshing depending on their background and personal taste.

For this reason, recommendations should not be repetitive or one-sided. Instead, staff should communicate with customers, understand their preferences, and recommend drinks that match their tastes and expectations.

It is also important not to make assumptions too quickly based only on customer requests or first impressions.

Some customers may think Lemonica lemonade looks lighter in colour or less sweet compared to other lemonade products and may request additional syrup before tasting the drink.

For regular customers who are already familiar with Lemonica products, adjustments can often be made based on their known preferences. However, for first-time customers, it is usually better to encourage them to first experience the standard Lemonica flavour profile before making significant adjustments.

If additional sweetness or syrup is still preferred after tasting, the drink can then be adjusted accordingly.

Our lemonade recipes are carefully designed with the customer's drinking experience in mind. The flavour may taste slightly stronger or sweeter when first served, as the recipe is created assuming that the ice will gradually melt while the customer enjoys the drink.

For this reason, when a customer requests a drink without ice, a small amount of water may be added to recreate the balance that would normally be achieved through the melting ice.

Good recommendations are not simply about selling products. They are about creating a personalized experience that helps customers discover a lemonade they truly enjoy.

5. Appearance

Customers judge the store before they taste the product.

Think of the Lemonica counter as your stage. Customers can always see the atmosphere, energy, and attitude of the team. Your posture, facial expression, movement, and communication all influence the customer experience.

Stand with confidence and maintain a positive presence in the store. Avoid leaning, crossing your arms, or appearing tired, disengaged, or unmotivated while on the floor.

Even during preparation or cleaning tasks, always remain ready to welcome customers at any time.

Cleanliness, organisation, and professional working habits are an important part of the Lemonica experience.

Always keep the counter area clean and organised throughout operations. Tools and equipment such as ice scoops, bottles, towels, and cleaning items should always be returned to their designated positions after use.

Staff should regularly wash and sanitise their hands and maintain clean working behaviour at all times.

Customers do not see job titles, experience levels, or training status. To customers, every team member represents Lemonica.

Whether you are a new employee, an experienced manager, or a trainee attending the LMN programme, customers expect the same level of professionalism, hospitality, and service.

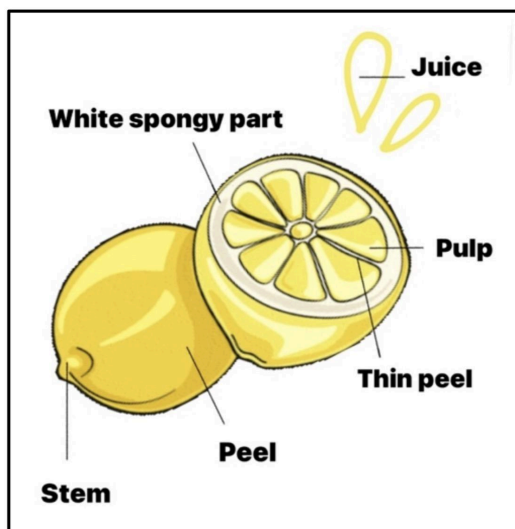

Professionalism is shown not only through customer service, but also through the way staff move, prepare drinks, clean, and maintain the working environment.

3. Basic Knowledge

1. Lemonica Lemonade Shot

Our Lemonade Shot is produced at a dedicated Lemonica factory and delivered to stores to ensure consistent quality and flavour across all locations.

To create the Lemonade Shot, carefully selected fresh lemons sourced from around the world are used.

At Lemonica, we view a lemon as a collection of individual parts, each contributing its own flavour and character. These include the peel, the white spongy part, thin peel, the stem, the fruit pulp and the juice.

Our Lemonade Shot is made by marinating whole lemons with sugar and carefully extracting the natural flavours and juices from the fruit.

Only lemons and sugar are used in the production process. No artificial colours, preservatives, or other chemical additives are added.

This unique process creates the distinctive flavour that forms the foundation of every Lemonica drink.

2. Product Recipes

All Lemonica products are prepared according to standard recipes.

Each recipe specifies the amount of ice, liquid measurements, and the order in which ingredients should be added.

Following the recipe correctly ensures consistent quality across all Lemonica stores.

Drinks can also be customized based on customer preferences.

4. Practical Knowledge

Store Positions

Store operations are generally divided into three positions:

1. Drink Maker
2. Cashier
3. Support Staff

1. Customer-First Experience

Customers only need to queue once, making the ordering process simple and convenient.

Many customers become frustrated after payment if they feel they are waiting too long for their drink. For this reason, drinks should be prepared and served as quickly as possible. As a guideline, standard drinks such as a Classic Lemonade should normally be served within 30 seconds from the time the order is taken.

2. Enhanced Customer Experience

Customers can watch their drink being prepared fresh in front of them.

Seeing the preparation process helps build anticipation and increases confidence in the quality of the product. Instead of simply waiting, customers become part of the Lemonica experience and can enjoy the process before receiving their drink.

3. Increased Sales Opportunities

The ordering process creates valuable opportunities for communication with customers.

By understanding customer preferences and making suitable recommendations, staff can naturally introduce additional options such as toppings, fruit additions, size upgrades, or alternative products.

These recommendations help customers find a drink that better matches their tastes, leading to higher customer satisfaction while also increasing sales and profitability for the store.

Always practice a customer-first mindset and provide an experience that makes customers want to return again and again!

Making Position

The Making Position is the centre of Lemonica's operations and customer experience.

Basic Workflow

1. Welcome the customer with energy and eye contact.
2. Take the order.
3. Recommend suitable products or customisations.
4. Communicate the order to the Register Position.
5. Acknowledge the customer while they are waiting.
6. Prepare the drink.
7. Serve the completed product to the customer.

Drink making is not only about preparing a beverage. It is also a performance that demonstrates quality, freshness, and attention to detail.

- Always prepare drinks where customers can clearly see the process.
- Pour Lemonade Shot from at least 15 cm above the cup.
- Stir thoroughly from the bottom to ensure all ingredients are properly mixed.

Register Position

The Register Position is responsible for creating a smooth and professional payment experience.

Basic Workflow

1. Welcome the customer together with the Making Position.
2. Receive and confirm the order.
3. Guide the customer to the payment area.
4. Repeat the order clearly and accurately.
5. Process the payment.
6. Hand over the product.
7. Offer straws and additional items if required.
8. Thank the customer.

- Face the Lemonica logo towards the customer.
- Hold the product with both hands.
- Smile and make eye contact when serving the drink.

If you are unsure which drink was ordered, do not ask the customer to identify the drink. Instead, confirm the order with the Drink Maker first.

When processing the payment, clearly repeat the full order to the customer. For example:

“One Original Lemonade, Regular Size.”

This gives the customer an opportunity to confirm the order and helps prevent mistakes.

5. Store Manager Job Description

The Mission of a Store Manager

What is the most important responsibility of a Store Manager?

The primary mission of a Store Manager is:

To generate profit for the store.

Sales are not just numbers. They are the result of the team's effort, strategy, and daily execution.

A Store Manager is responsible for continuously improving sales, controlling costs, developing staff, and maintaining operational standards in order to create sustainable profitability.

Every action taken in the store should ultimately contribute to both customer satisfaction and store profit.

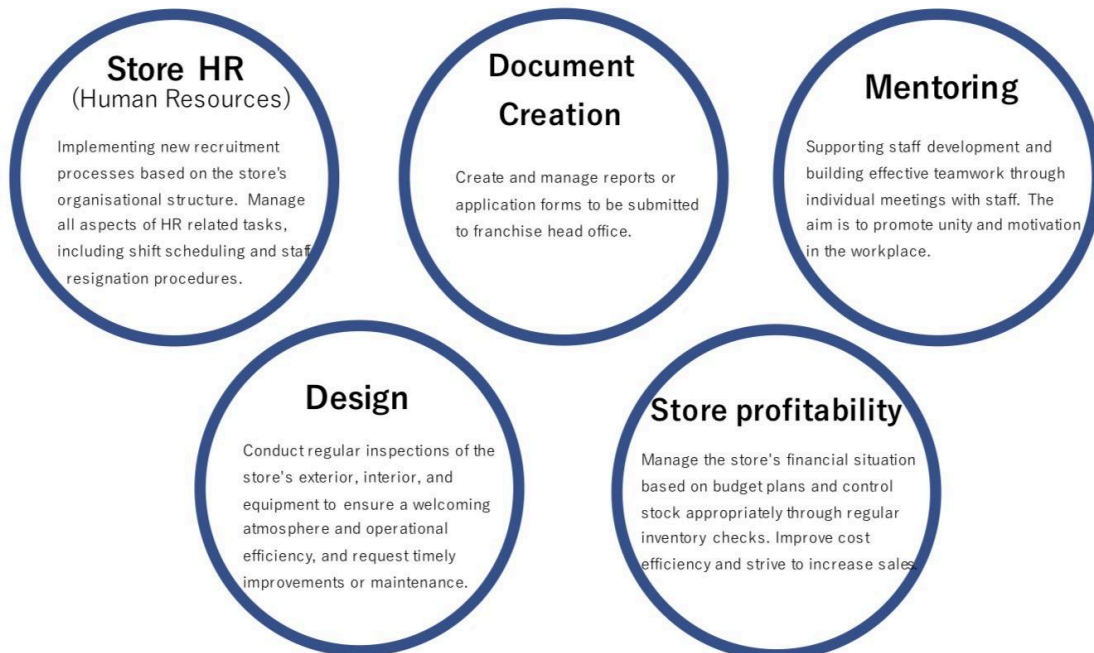

Operations

Activities focused on the daily running of the store, including staff management, customer service, safety, and operational standards.

Administration

Activities focused on planning, organisation, and the long-term success of the store.

1. Operations

Customer Experience

Customer Complaints

Store Managers must understand how to handle customer complaints professionally and calmly.

When a complaint occurs, the priority is to fully understand the situation, identify the root cause, and provide a solution that leaves the customer satisfied whenever possible.

If a staff member receives a complaint, they should report the incident to the Store Manager as soon as possible. The report should include:

- Who was involved
- When and where the incident occurred
- What products were purchased
- Details of the complaint
- The customer's behaviour and concerns
- Customer contact information (if available)

Service Quality

Managers are responsible for maintaining high service standards.

Regularly review customer interactions, hospitality, product quality, cleanliness, and overall store presentation. Always look for opportunities to improve the customer experience.

Relationship Building

Build positive relationships with neighbouring stores, shopping centre management, suppliers, and business partners.

Strong communication helps create a better working environment and can support store performance.

Staff Absence Management

Managers should have a clear plan for handling unexpected staff absences.

Absence procedures should be explained during staff induction so that everyone understands the process before an issue occurs.

Safety

Expiry Date Management

Regularly check product expiry dates and date labels.

All prepared ingredients and opened products must be labelled, stored correctly, and used within their approved shelf life.

Emergency Procedures

Ensure all staff understand emergency procedures, including fire evacuation routes, emergency contacts, and incident reporting procedures.

Cleaning & Hygiene

Maintain high standards of cleanliness throughout the store.

Daily and weekly cleaning tasks must be completed consistently to ensure a safe and hygienic environment for both customers and staff.

Risk Prevention

Identify and eliminate potential hazards before they become problems.

Regularly check floors, equipment, electrical cables, storage areas, and customer walkways to minimise accident risks.

Communication

Team Communication

Managers must ensure that important updates, procedures, and operational changes are communicated clearly to all staff members.

Information should not only be shared but also understood and followed.

When updates are shared through communication channels such as WhatsApp, team members should acknowledge that they have read the information by reacting to the message. This creates accountability and helps managers confirm that important updates have been seen.

However, a reaction alone does not guarantee understanding. Managers should regularly follow up, remind staff when necessary, and confirm that important updates are being applied in practice.

Opening & Closing Checks

Ensure all opening and closing procedures are completed correctly and recorded where required.

Store checklists should be reviewed and updated regularly.

Updating Store Systems & Documents

Operational documents, checklists, and training materials should be reviewed regularly and updated whenever necessary.

Reporting

Managers are responsible for reporting incidents, complaints, maintenance issues, and important operational updates to the appropriate people.

Training & Development

Staff Induction

Provide new team members with all essential information before their first shift, including:

- Company values and expectations
- Store rules and procedures
- Health & Safety requirements
- Emergency procedures
- Employment and payroll information

The goal is to ensure staff feel confident and prepared from day one.

Training & Coaching

Managers are responsible for ensuring staff follow operational standards and continue to improve their skills.

Provide regular feedback, coaching, and support.

Performance Reviews

Conduct regular one-to-one meetings with staff to discuss:

- Performance
- Development opportunities
- Career goals
- Feedback and concerns

Support staff growth and progression whenever possible.

Store Profitability

Cost Control

Monitor and control store costs, including ingredients, packaging, utilities, and labour.

Look for opportunities to improve efficiency without compromising quality.

Sales Growth

Actively encourage upselling, add-ons, and product recommendations.

Support local marketing initiatives and social media activity to attract new customers and increase repeat business.

Waste Reduction

Identify the causes of waste and implement solutions to reduce unnecessary losses.

2. Administration

People Management

Shift Management

Create schedules that balance business needs with staff availability, skills, and development opportunities.

Recruitment

Managers are responsible for supporting the recruitment process and planning staffing needs in advance.

Successful recruitment requires forward planning, particularly before busy trading periods. New team members should be given sufficient time for onboarding and training before peak seasons.

Team Structure

Managers should maintain an up-to-date team structure and clearly define responsibilities and reporting lines within the store.

Staff Leaving Process

Managers should ensure that all staff understand resignation procedures and notice requirements from the beginning of their employment.

When a team member leaves, managers should support a smooth transition and complete all necessary administrative procedures.

Store administration

Documentation

Managers are responsible for creating, maintaining, and regularly updating operational documents, records, and store procedures.

Accurate documentation helps ensure consistency and supports effective store management.

System & POS Management

Managers are responsible for maintaining store systems and ensuring POS information is accurate and up to date.

When system updates or menu changes are introduced, managers should communicate the changes clearly and provide any necessary staff training.

Coaching&Mentoring

One-to-One Meetings

Managers should hold regular one-to-one meetings with team members to strengthen communication and understand their goals, concerns, and development needs.

Support each employee's career aspirations and help them identify opportunities for growth within the business. When staff feel valued and supported, they are more engaged and more likely to remain with the company.

Team Management

Managers are responsible for leading a diverse team with different levels of experience, skills, and backgrounds.

Understanding each team member's strengths, motivations, and potential allows managers to provide the right support and create a stronger team.

Right Person, Right Position

One of a manager's key responsibilities is placing people in roles where they can perform at their best.

By recognising individual strengths and assigning responsibilities accordingly, managers can improve both employee satisfaction and overall store performance.

Store Appearance & Maintenance

Managers are responsible for maintaining the overall appearance and condition of the store.

Store Profit Management

Sales Targets

Managers should set realistic daily, weekly, and monthly sales targets based on historical performance, seasonal trends, and business objectives.

Regularly review performance and adjust action plans when necessary.

Labour Cost Management

Managers must create schedules that balance excellent customer service with efficient labour usage, ensuring labour costs remain within budget.

Cost of Goods & Stock Control

Managers should monitor stock levels, inventory counts, waste, and food costs to maintain profitability.

Regular stocktakes and performance reviews help identify opportunities to improve efficiency and reduce unnecessary losses.

3. Example Store Manager Tasks

Tasks on Non-Store Days

When not scheduled to work in-store, managers should continue monitoring store performance and business operations.

- Review sales performance
 - Check stock levels and upcoming orders
 - Review company announcements and updates
 - Check operational manuals and procedures
 - Review internal communications
 - Check emails and messages
 - Monitor staff attendance and availability
-

Tasks on Store Working Days

When working in-store, managers are responsible for both operational leadership and team development.

- Review the daily rota and position assignments
 - Check overall store condition and cleanliness
 - Support operations during busy periods
 - Coach and develop team members
 - Provide direction and feedback to staff
 - Conduct inventory checks
 - Check preparation levels and replenishment needs
 - Place orders and review low-stock items
 - Complete cash handling and end-of-day procedures
 - Record daily sales reports
 - Submit required reports to owners or head office
-

Monthly Manager Responsibilities

Managers should regularly review business performance and plan for future growth.

- Analyse sales performance and trends

- Attend management meetings
- Create staff rotas
- Conduct one-to-one meetings with team members
- Complete stocktakes and cost analysis
- Review and update operational documents and procedures
- Set targets and action plans for the following month

6. Education & Team Development

Lemonica is a brand that continuously pursues growth.

Managers are responsible not only for daily operations, but also for supporting the growth and development of their team members.

By continuously improving their own skills and knowledge, managers create an environment where the entire team can grow together.

Understanding Current Performance

Effective development starts with understanding both your own performance and the current level of each team member.

Managers should clearly identify:

- Their own strengths and areas for improvement
- The current performance level of each team member
- Individual development opportunities
- Clear development goals and expectations

When managers and team members share the same understanding of current performance and future goals, training becomes more effective, consistent, and measurable.

Giving Effective Instructions

Be Specific

When giving instructions, avoid vague expressions. Use clear numbers, targets, timeframes, and expectations whenever possible.

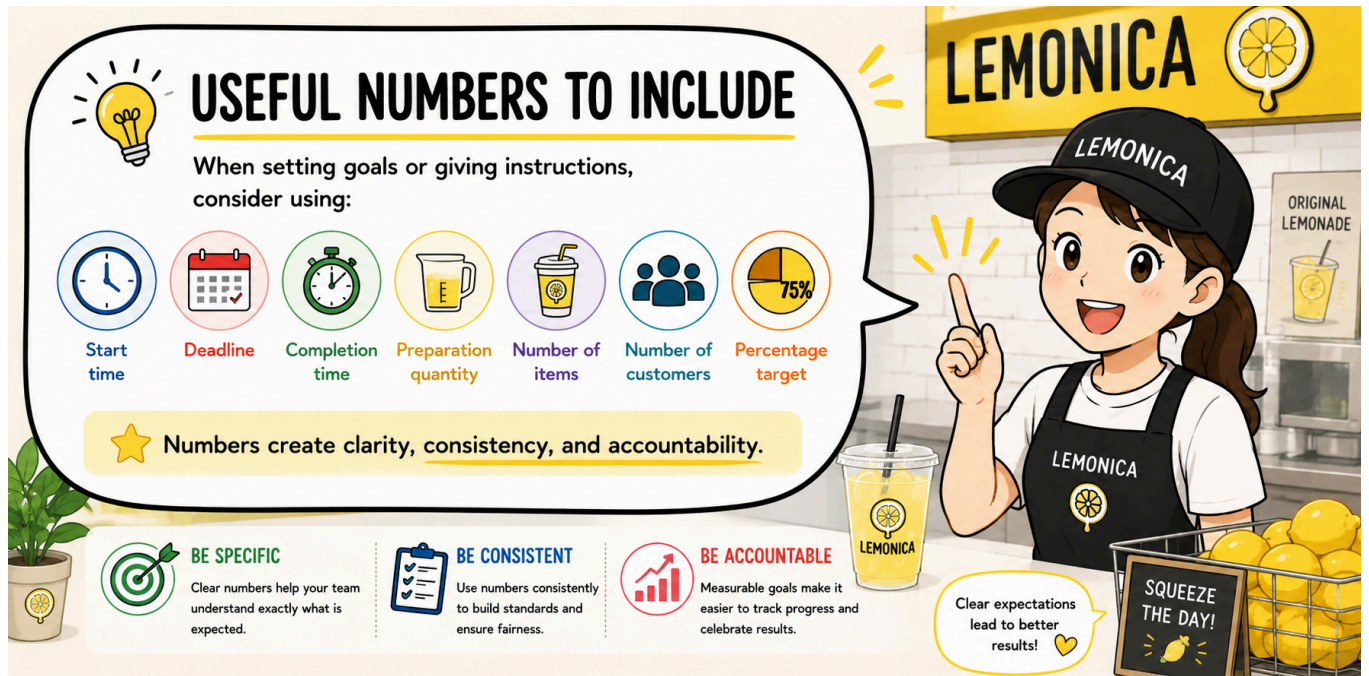

Examples:

✗ “Serve customers faster.”

✓ “Keep average waiting time under 3 minutes.”

✗ “Promote Extra Lemon.”

✓ “Achieve 5 Extra Lemon sales today.”

Encourage Completion Reporting

Team members should report when assigned tasks are completed.

This allows managers to:

- Track progress efficiently
- Identify support needs quickly
- Move on to the next priority effectively

Explain the Reason

When introducing new rules, procedures, or changes, explain why they are important.

Effective Feedback

Recognise Strengths

Good managers actively look for positive behaviours and achievements.

Examples:

Maintaining excellent cleanliness and food safety standards

- Following recipes and operational procedures consistently
- Keeping workstations organised and well presented

Coaching for Improvement

When performance does not meet expectations:

1. Identify the gap.
2. Explain the standard.
3. Show the correct way.
4. Practice together.
5. Review the result.

Create a Growth Environment

Every team member learns differently.

Managers should adapt their coaching style to support individual growth and help each person reach their potential.

Organisation Structure

As a Store Manager, think about what your ideal team structure would look like.

- How many team members are needed?
- What positions are required?
- What responsibilities should each position have?

Let's Build Your Team!

Create an organisation chart for your ideal store team.

Include:

- Position title
- Person responsible
- Key responsibilities for each position (5–10 items)

7. Food Safety & Hygiene

At Lemonica, customer safety is our highest priority.

Maintaining excellent food hygiene standards is essential for protecting customers, ensuring legal compliance, and maintaining the quality of our products. Food safety is not the responsibility of one individual—it is the responsibility of the entire team.

As a manager, you are responsible for ensuring that all team members understand and follow Lemonica's food safety procedures at all times.

1. Company Policy and Compliance
2. Key Laws Related to Food Safety
3. Basic Knowledge of Food Hygiene
4. Requirements During Food Preparation and Production
5. Emergency Response Procedures

1. Company Policy and Compliance

Company Policy

A company policy defines what kind of company we want to be and what value we aim to provide to society, our customers, and consumers.

Particularly in food production and service, it is our responsibility to provide safe, high-quality products with the customer at the centre of everything we do.

To fulfil this responsibility, all staff members are expected to understand the company's policies and act in accordance with them.

Please familiarise yourself with Lemonica's company policies and apply them in your daily work.

Compliance

Compliance means following laws, regulations, and social standards.

This applies to Lemonica as a company as well as to each individual employee.

Violating laws or regulations can result not only in a loss of trust in the company but also in the loss of employment opportunities. There are many examples of businesses that have lost credibility and ultimately failed due to compliance violations.

Therefore, maintaining compliance is extremely important for both our work and the future of the company.

2. Key Laws Related to Food Safety

Food businesses in the United Kingdom must comply with food safety legislation designed to protect customers and ensure food is safe to eat.

Food Safety Act 1990

<https://www.food.gov.uk/about-us/key-regulations>

The Food Safety Act 1990 is the primary food safety law in the UK. It requires food businesses to ensure that food is:

- Safe to eat
- Properly labelled
- Not misleading to customers
- Produced and handled hygienically

Failure to comply may result in enforcement action, fines, or prosecution.

Food Hygiene Regulations

<https://beta.newark-sherwooddc.gov.uk/business-licensing/food-hygiene/food-hygiene-businesses/food-hygiene-legislation-enforcement>

Food Hygiene Regulations require food businesses to:

- Maintain hygienic premises and equipment
- Follow safe food handling practices
- Control food temperatures appropriately
- Train staff in food safety procedures
- Implement a food safety management system

Managers are responsible for ensuring these standards are followed at all times.

HACCP (Hazard Analysis and Critical Control Points)

<https://www.food.gov.uk/>

HACCP is a food safety management system used to identify, evaluate, and control food safety hazards.

At Lemonica, HACCP principles are applied through:

- Temperature monitoring
- Cleaning and sanitising procedures
- Prevention of cross contamination
- Allergen management
- Food storage controls
- Record keeping and verification

Managers must understand HACCP principles and ensure they are applied consistently in daily operations.

Food Allergies and Allergen Legislation

<https://www.food.gov.uk/business-guidance/allergen-guidance-for-food-businesses>

Food businesses are legally required to provide accurate allergen information to customers.

Under UK Food Information Regulations, the following 14 allergens must be declared when present in food products:

Managers must ensure:

- All allergen information is accurate and up to date
- Staff never guess allergen information
- Customers receive correct allergen guidance
- Cross contamination risks are minimised

Natasha's Law

<https://www.gov.uk/government/news/natashas-legacy-becomes-law>

<https://www.food.gov.uk/allergen-labelling-changes-for-prepacked-for-direct-sale-ppds-food>

Under Natasha's Law, all Prepacked for Direct Sale (PPDS) products must display:

- Product name
- Full ingredients list
- Clearly highlighted allergens

Managers must ensure all applicable products comply with these requirements.

Consumer Protection and Fair Trading

<https://www.gov.uk/government/publications/unfair-commercial-practices-cma207>

Digital Markets, Competition and Consumers Act 2024 (DMCCA)

Businesses must provide accurate and honest information about products and services.

Misleading descriptions, false advertising, hidden charges, fake reviews, or omitting important information are prohibited under UK consumer protection law.

Examples include:

- Claiming a product is "Freshly Squeezed" when it is not.
- Advertising a promotion that is not actually available.
- Describing a product as "Sugar Free" when it contains sugar.
- Claiming ingredients are from Japan when they are sourced elsewhere.
- Hiding additional charges or fees from customers.
- Providing inaccurate information about allergens or ingredients

3. Basic Knowledge of Food Hygiene

About 5S

5S is a workplace organisation system consisting of five principles that help create and maintain a safe, efficient, and hygienic working environment.

By following 5S, staff can improve food safety, reduce waste, increase efficiency, and maintain consistent operational standards.

1. Sort

Remove unnecessary items from the workplace.

Dispose of, store, or relocate tools, equipment, and materials that are not regularly used to create a safer and more efficient workspace.

2. Set in Order

Organise necessary items so they are easy to find and use.

Frequently used tools and supplies should have designated locations, with clear labelling where appropriate.

3. Shine

Keep the workplace clean at all times.

Keep the workplace clean through regular cleaning and maintenance of equipment, workstations, and storage areas.

4. Standardise

Create consistent standards for organisation and cleaning.

Establish clear procedures and standards for cleaning, organisation, labelling, storage, and food safety practices so that all staff follow the same methods.

5. Sustain

Make 5S part of everyday operations.

Make 5S part of everyday operations. Regularly review standards, train staff, and ensure procedures are consistently followed to maintain a safe and organised workplace.

Benefits of 5S

- Creates a cleaner and more organised workplace.
- Improves operational efficiency and saves time.
- Encourages teamwork and accountability.
- Reduces workplace hazards and accidents.
- Supports food safety and product quality.
- Reduces waste and operational errors.

What is Food Poisoning?

Food poisoning is caused by eating food that has been contaminated with harmful germs, such as bacteria and viruses. Common symptoms include diarrhoea, vomiting, stomach cramps, and fever.

Harmful bacteria and other microorganisms can multiply when the following conditions are present:

- **Temperature** – Warm temperatures encourage bacterial growth.
- **Moisture** – Microorganisms need water to survive and multiply.
- **Nutrients** – Food provides the nutrients that bacteria need to grow.

1. Prevent Contamination

Prevent bacteria and viruses from contaminating food.

- Maintain good handwashing practices and wear gloves when required.
- Keep utensils and equipment clean and properly sanitised.
- Store food covered and off the floor at all times.
- Use designated containers and storage areas for different products.

2. Prevent Growth

Control the conditions that allow bacteria to multiply.

- Keep chilled food at **8°C or below**.
- Keep frozen food at **-18°C or below**.
- Monitor and record refrigerator and freezer temperatures regularly.
- Take corrective action immediately if temperatures fall outside acceptable limits.

Additional Controls

- Cool food quickly after preparation if applicable.
- Avoid leaving food at room temperature.
- Produce only the quantity needed to minimise unnecessary storage.
- Do not overload refrigerators or freezers, as this may affect temperature control.

3. Destroy Bacteria

Destroy harmful bacteria through effective cleaning, sanitising, and where applicable, cooking.

Examples of approved time and temperature combinations include:

- 70°C for 2 minutes
- 75°C for 30 seconds
- 80°C for 6 seconds

These temperatures help destroy harmful bacteria and make food safe to eat.

Food-contact surfaces, utensils, and equipment must be cleaned and sanitised regularly.

4. Requirements During Food Preparation and Production

Employee Health

- If you experience symptoms of illness, you must inform your manager before starting work and follow their instructions. Staff suffering from diarrhoea or vomiting must not return to food handling duties until at least 48 hours after symptoms have stopped.
- Symptoms that must be reported include:
 - Diarrhoea
 - Vomiting
 - Fever
 - Stomach pain
 - Coughing
- If you have cuts, wounds, or infected skin on your hands, inform your manager immediately. Any wounds must be properly cleaned, covered with a waterproof coloured dressing, and protected with gloves where appropriate.

Handwashing

Always wash your hands:

- Before starting work
- After using the toilet
- After eating, drinking, or taking a break
- After touching dirty surfaces or waste
- After touching your face, hair, or phone
- After handling raw food
- When changing tasks
- Whenever hands may have become contaminated

Hand washing with soap and water

Help us stop the spread of infections. Wash your hands using the following steps:

Before starting Production

- Review the day's work schedule.
- Check that all required ingredients, packaging, labels, and supplies are available. Replenish any shortages before starting.
- Check that all required ingredients, packaging materials, labels, and supplies are available. Replenish any shortages before starting production.
- Ensure the work area is clean, organised, and ready for production. Clean and sanitise the area if necessary before starting

During Production

- Do not bring unnecessary items into food preparation areas. (e.g. mobile phones, wallets, stationery, cosmetics)
- Replace damaged or contaminated gloves immediately.
- Follow operating procedures when using machinery. Stop using equipment immediately if a fault is detected.
- Focus on one task at a time and work carefully.
- Check and record refrigerator and freezer temperatures at designated times.
- Ensure all prepared and opened products are correctly labelled and within their use-by date.
- Eat and drink only in designated staff areas.
- Remove aprons before using the toilet and wash hands before returning to work.
- Keep doors closed whenever possible to prevent pest entry.
- Use designated walkways and avoid unsafe shortcuts.
- Report any incidents, contamination risks, or equipment faults immediately and take appropriate corrective action.

Date Label Management

Food safety and stock control depend on accurate date labelling.

- Apply date labels to all prepared, opened, and defrosted products.
- Check date labels at the start of every shift.
- Follow FIFO (First In, First Out) stock rotation.
- Inform the team if products are approaching their use-by date to minimise waste.

DATE LABEL EXAMPLE

	PRODUCT NAME Strawberry Puree	 Write the name of the product.
	PREPARED DATE 12 JUN 2026 10:30	 Write the date and time when the product was prepared.
	USE BY 17 JUN 2026 10:30	 Write the use-by date and time.
	STAFF NAME Ayame	 Write the name of the staff member who prepared it.

 After always check:

- ☒ A label is attached
- ☒ All fields are completed
- ☒ The information is accurate

During Washing

- Ensure the correct cleaning chemicals are being used and clearly label all containers with their contents.
- Follow the designated washing procedures.
- Disassemble equipment where necessary and clean thoroughly to prevent dirt and food residues from remaining between parts.
- Ensure cleaning chemicals are diluted at the correct concentration and measure chemicals and water accurately.
- Rinse thoroughly to remove any chemical residue.
- After washing, store utensils and equipment in a clean and dry storage area.
- Return all utensils and equipment to their designated storage locations after cleaning.

During Cleaning

- Clean floors, walls, ceilings, air conditioning units, lighting, refrigerators and other areas according to the store cleaning schedule.
- Ensure the correct cleaning chemicals are being used and clearly label all containers.
- Check that cleaning chemicals are diluted to the correct concentration.
- If water is spilled on the floor, remove excess water and dry the area thoroughly.
- Segregate waste correctly and dispose of it in the designated waste collection area.
- After use, return cleaning tools to their designated locations and store them properly.

Handling Food

- Check all deliveries carefully and remove any damaged, spoiled, or unsuitable products.
- Keep raw materials, prepared ingredients, and finished products separated to prevent cross-contamination.
- To prevent the growth of microorganisms, do not leave chilled or frozen ingredients at room temperature longer than necessary.
- Do not store food near sinks, waste bins, or other potential sources of contamination.
- Never place food directly on the floor.
- Keep food covered or protected during storage to prevent contamination.
- Follow FIFO (First In, First Out) stock rotation procedures.
- Apply date labels to opened products and prepared ingredients, including the preparation/opening date and use-by date.

End of Production

- Follow the washing procedures and ensure all utensils and equipment have been cleaned properly.
- Follow the cleaning procedures and ensure the work area has been cleaned and organised.
- Carry out routine maintenance and inspections of production equipment.
- Check utensils and equipment for any damage and take appropriate action if necessary.
- Verify that all cleaning and maintenance tasks have been completed and record them on the designated checklist.
- Before leaving the work area, switch off equipment and lights where appropriate. Refrigerators, freezers, and other equipment that must remain operational should be left running.

5. Emergency Response

Why Emergency Preparedness Matters

Responding quickly and appropriately during emergencies helps minimise risks to customers, staff, and the business.

Learning from incidents and reviewing procedures helps prevent recurrence and improves food safety standards.

All staff should understand the actions required during an emergency and be prepared to respond appropriately.

Check, Communicate, Report

Check: Confirm the situation and identify the actions required.

Communicate: Share the information promptly with the relevant people.

Report: Report the incident, actions taken, and outcome according to company procedures.

Importance of Record Keeping

- Keep records accurately and clearly.
- Temperature, cleaning, and production records help demonstrate food safety compliance.
- Records may be required during audits, complaints, or investigations.
- If a mistake is made, cross it out with a single line and write the correct information.

8. Ordering & Forecasting

Managers are responsible for ensuring the right products are available at the right time and in the right quantity.

Effective ordering and forecasting help prevent stock shortages, reduce waste, control costs, and support sales growth.

Choosing Suppliers

For day-to-day operations, ingredients, packaging materials, and consumables may be sourced from different suppliers depending on the item.

When selecting suppliers, consider:

- Product quality
- Cost
- Delivery charges
- Lead time
- Reliability
- Minimum order quantities

What is an Order Quantity?

An order quantity is the target stock level that should be maintained in the store.

There are two main ways to determine order quantities.

1. Existing Stores

Set a fixed stock level (Par Level) for each item.

Example:

- Regular Cups: 3 cases
- Lemonade Shot: 5 packs

When stock falls below the set level, place an order to replenish it.

2. New Stores / Peak Trading Periods

(e.g. Grand Opening, Christmas, School Holidays)

When normal stock levels have not yet been established, order quantities should be based on forecasted sales and budgeted demand.

Exercise 1

Situation

Your store places orders twice per week.

Order Days

- Tuesday 8:00 PM
- Friday 8:00 PM

Delivery Schedule

- Orders arrive the following day.

Questions

1. If an order is placed on Tuesday at 8:00 PM, when will it be delivered?

Answer: _____

2. If an order is placed on Friday at 8:00 PM, when will it be delivered?

Answer: _____

3. How many days must the Wednesday delivery cover before the next delivery arrives?

Answer: _____

4. How many days must the Saturday delivery cover before the next delivery arrives?

Answer: _____

Exercise 2

Situation

It is Thursday at 8:00 PM. The store currently has 10 packs of Lemonade Shot in stock.

The next order can be placed on Monday at 8:00 PM.

Forecast sales:

- Weekdays: £1,200 per day
- Weekends: £2,500 per day

Additional Information

- Average selling price per drink: £4.00
- 1 Whole Shot Pack produces 50 drinks
- 1 case contains 6 packs

Questions

1. What is the sales value of one Whole Shot Pack?

Answer: _____

2. What is the forecast sales revenue until the next order?

Answer: _____

3. How many drinks are expected to be sold?

Answer: _____

4. How many Whole Shot Packs are required?

Answer: _____

5. If the current stock is 10 packs, how many packs should be ordered?

Answer: _____

9. Inventory Counting & Cost Control

As a store manager, you are responsible not only for managing stock levels, but also for controlling costs and protecting profitability.

Regular inventory counting helps you:

- Understand stock usage
- Identify waste and losses
- Monitor food cost performance
- Improve ordering accuracy
- Maintain healthy profit margins

Inventory Counting Process

Step 1: Prepare the inventory sheet

Gather the required inventory count sheet and ensure all stock locations are included.

Step 2: Count stock accurately

Count all inventory items using the agreed counting method.

Step 3: Calculate inventory value

Multiply the quantity counted by the unit cost of each item.

Step 4: Calculate monthly food cost

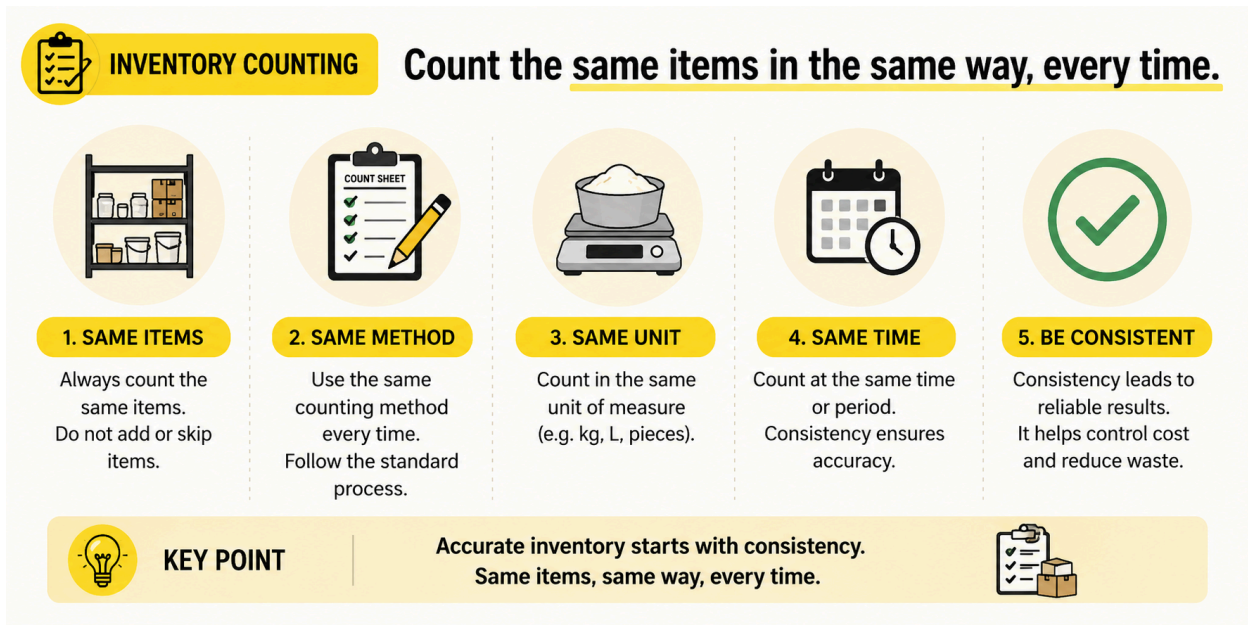

$\text{Opening Inventory} + \text{Purchases} - \text{Closing Inventory} = \text{Food Cost}$

Step 5: Compare actual vs theoretical food cost

Review any significant differences and identify possible causes.

Step 6: Create an action plan

Use the results to improve ordering, portion control, waste management and operational standards.

Food Cost

Food cost is the cost of ingredients used to generate sales.

$$\text{Food Cost \%} = \text{Food Cost} \div \text{Net Sales} \times 100$$

Theoretical Food Cost

Theoretical Food Cost is the expected food cost when all recipes and portion sizes are followed correctly.

If actual food cost is significantly higher than theoretical food cost, possible causes may include:

- Waste
- Over-portioning
- Stock losses
- Incorrect stock counts
- Recipe inconsistencies

Exercise

Calculate the food cost of one **Medium Fizzy Lemonade**.

Product Information

Selling Price

- Medium Fizzy Lemonade: **£4.00**

Cost Information

Whole Shot

- Cost per Whole Shot Pack: £50.00
- 1 Whole Shot Pack produces 50 drinks

Carbonated Water

- Cost per Cylinder: £70.00
- 1 Cylinder produces 10,000 drinks

Packaging

- Cup: £70.00 per case (1,000 cups)
- Lid: £50.00 per case (1,000 lids)
- Straw: £25.00 per case (500 straws)

Question

1. List all ingredients and packaging used for one Medium Fizzy Lemonade.
2. Calculate the cost per serving for each item.
3. Calculate the total product cost of one Medium Fizzy Lemonade.
4. Calculate the Food Cost Percentage.

10. Store Opening Preparation

Opening a new store requires planning, organisation, and effective time management.

In this section, you will learn how to prepare for a successful store opening by creating schedules, assigning responsibilities, and coordinating key tasks.

Good preparation helps ensure a smooth opening and establishes strong operational standards from day one.

Internal Project Schedule

Identify key opening tasks and assign responsibility for each item.

Examples:

- Licences and compliance
- Equipment installation
- Utility setup
- Supplier setup
- Account creationfhgfdjfyrgdzs`

Staff Training Schedule

Create a training schedule to ensure all team members are prepared before opening.

Manager Schedule

Create a personal schedule covering meetings, recruitment, supplier coordination, and opening tasks.

Daily Check	Date:
--------------------	--------------

Date: _____

09:30	Name		Restock	19:30	Name		Send restock request and mention next morning shift staff		
			Unlock cupboards and fridges				Check for expired items (ensure opened items are labelled)		
			Turn on the POS				Check the cola and gas		
			Set the Bin bags				Wipe the inside of fridges, Ice makers, water boiler		
			Set up Ice, Prep, Ultra, Original, Spoons, Ladles				Replace the Prep and Ultra		
			Check all expired items				Take out a stainless steel drip tray grate and wash it.		
			Set the clothes on each sticker (R2, B6, Y2)				Wash the sauce container and wipe soda dispenser		
			Wipe down around shop/Glass sign				Wash Lemon squeezer attachments and sanitize it		
			Organise the Sandwiches				Empty bins and wipe them down		
			Note fridge temp. (1 to 3 in the shop and 4 in the storage)				Wipe down Blenders, outside of Fridges		
			Set Customer area				Wipe down Glass sign, around the shop		
			Turn on the switch A to E				Grab Broom, Scruber, Floor cleaner, Mop, Whole shot, Fruits, St sauce, Bottle of water and check fridge Temp(4)		
		10:00					Preparation	21:00	
	Make mojito (3batches)				Note fridge temp. (1 to 3 in the shop and 4 in the storage)				
	Make Sales report sheet from whatsapp								
	Wipe and organise around the shop				Turn off the lights (A to E)				
13:00			Order (F&A: Wed, Factory: Fri)				Wipe the customer area and put everything back		
			Wipe and organise around the shop				Put a cover on the sandwich		
			Refill the Ice				Wash all dishes, dry and put them in cupboards		
16:00			Preparation				Refill ice on right side, cover with foil		
			Wipe and organise around the shop				Mop the floor		
			Refill the Ice				Put Prep and Ultra in the fridge and stainless steel drip back		
							Record Food loss		
							Finish daily sales report , print sales report and send them		
							Wash and hang the clothes		
							Lock the fridge 2,3 and all cupboards		
							Check the daily check sheet and send it to whatsapp group		

Training sheet

Name								
Start date								
Category		Detail	Explained	Checked	Checked	Checked	Final	Note
Basement	Storage	Can go to the storage-shop without getting lost						
	About storage	Keep the storage rule, clean/organise						
	Mojito shelf	Can manage the mojito correctly						
	Restock	Can restock correctly						
Preparation	Label	Is able to label, fruits, prep etc.						
	Portion	Can portion right amount (65g)						
	Cut fruits	Have knowledge of every cut fruits and can cut with glove						
	Original	Can make original correctly						
	Prep	Can make prep correctly in order						
	London shot	Can make London shots correctly						
	Ultra	Can make Ultra shots correctly even more than 2batch						
Around the shop	Mojito	Can make mojito correctly (without sugar being visible in mojito).						
	Cloth	Can use cloth each colour correctly						
	Wipe around shop	Can wipe all required areas of the shop, without skipping some areas.						
	Around straw	Can throw the straw bins and refill it						
Till	Organised sands	Can organise sandwiches						
	WF discount	Can apply WF discount						
	Communication with maker	Can type order on POS correctly						
	Quite time	Recognise quite time and do task (Notion)						
Make	Ice measure	Put correct amount of ice in the cup without using the scale						
	Recipe	Remember all recipes						
	Explain drinks	Can explain all items						
	Drink preference	Can adjust ice and syrup as customer order						
Closing	Restock	Send restock message with mention on the group						
	Wipe shop	Can wipe all spaces with correct product						
	Wash	Can wash all items with correct product without it being sticky						
	Sales report	Can create sales report, fill it out, print receipt and send it.						
Change	Cola	Can change the cola						
	Gas	Can change the gas						
Maintain clean	Fridge 1	Can complete maintenance cleaning sheets in order						
	Fridge 2, 3	Can complete maintenance cleaning sheets in order						
	Ice machines	Can complete maintenance cleaning sheets in order						
	Ware house	Can complete maintenance cleaning sheets in order						
	Counter	Can complete maintenance cleaning sheets in order						
	Ice stocker	Can complete maintenance cleaning sheets in order						
	Soda dispenser	Can complete maintenance cleaning sheets in order						
	Kettle	Can complete maintenance cleaning sheets in order						
	Acid/Tea containers	Can complete maintenance cleaning sheets in order						
Order	Factory	Can order to the factory correctly						
	F&A	Can order to the F&A correctly

MAINTAIN CLEANING

Please complete the following tasks once every 15 days
and write down your name and the date when you did.

Month

Fridge ①

1th-15th

16th-31th

Doer/Checker

Doer/Checker

1) remove the bolt and clean the filter with brush. (only right side)

2) clean the stickiness with soda or hot water (inside and outside)

3) wipe down with mr muscle glass cleaner (inside and outside)

Fridge ②③

1) take out everything from the fridge

2) remove the silver hooks and the white racks + wash them with soap

3) wipe away stickiness with soda or hot water (inside and outside)

4) wipe down with sanitizer (inside and outside)

Ice machine

1) wash all the filters without soap and dry well

2) wipe down handle of the Ice machine door, outside and filter cover

Warehouse

1) take out everything from the fridge

2) wipe down the fridge (inside and outside) with sanitizer

3) sweep the floor with broom

4) mop the floor with bleach

Counter

1) take out all items under the counter

2) wipe away stickiness under the counter with soda or hot water

3) wipe down with sanitizer

MAINTAIN CLEANING

Please complete the following tasks once every 15 days
and write down your name and the date when you did.

Month

Ice stocker

1) remove all ice

2) remove the silver cover and wash it with soap

3) wash the inside of the sink with soap

1th-15th

16th-31th

Doer/Checker

Doer/Checker

Soda Dispenser

1) take apart the soda gun

2) remove the black stains from the grey area with yellow brush

and rinse it 3 times

3) wash the spout and rubber with soap

4) twist and wash the silver hose with sanitizer

5) Clean the dust from the filter of the cooler (under the soda dispenser) using white brush

Kettle

1) mix acid in hot water and soak for 30 minutes to remove limescale

2) dispose of mixture and rinse with cold water

Blender

1) soak the bottom in water and acid for 30 minutes

2) throw the water and rinse it

3) wipe the out

Acid and Tea containers

wash them with soap

Sticker inspection

peel all the dirty stickers on food containers, serve bottles etc
